Addison started working at BH+L in 2019. Since joining the team he has worked in various sectors including healthcare, higher education and residential. Addison assisted on the Challenger Center for Montgomery County Community College, a center that focuses on teaching children different aspects of STEM education within the lens of the Challenger space shuttle launch in 1986.

Outside the office, Addison enjoys using the skills and knowledge that he has gained from his studies and time in the workforce to help friends and family with design / build projects ranging from sheds to greenhouses as well as staying active as much as possible. He enjoys filling his free time with activities such as running, biking, long boarding, kickball, and rock climbing.
